RELEVANT EXPERIENCE

Seventeen years continuity experience on commercials, feature films, and television productions. I have broad knowledge of both practicing and educating in continuity and photography. I trained in continuity at the Australian Film Television and Radio School, Sydney, in 1995. I have subsequently trained others in continuity.

My background is in photography. I operated my own photographic business specializing in magazine and PR work. I continue to do a small amount of photography work and academic study in this area, graduating last year from Massey University's Graduate Diploma in Photography. During the last twelve years I have predominantly worked on overseas commercials as their short duration fitted with family demands. These large budget commercials have allowed me to work with latest technology, prominent directors, producers, and DOPs.
