## Curriculum Vitae

### Personal profile

Born in Netherlands 1959 and moved to NZ in 1962.

Started my career in sound 1977 at the age of 17, when I was employed by Vidcom Communications and took over the position of location and post sound, for a period of 2yrs .

I was fortunate enough to be involved with the re- equipping & building of a new studio for the company .

1982 saw me going freelance and into the world of Documentry's, TV commercials (both local & international), television programmes and drama productions,which is still my main stay today .

Recording has taken me to some remote,exotic and dangerous parts of the world,together with Europe, United Kingdom,The middle east, North America and of course throughout the Pacific basin .

I have a passion for sound recording and the Film and Television industry as a whole, and over the years I have always believed in taking an intergral part in the making of any project, which includes intergrating with cast and crew and making sure the talent/cast feels as comfortable as possible.

I Travel on a EU Passport and have an "I" visa ( journalist) for the USA
