Profile

Having started my career in the film & TV industry only three years ago, I am always looking for roles that offer new creative opportunities. The projects I enjoy the most are the ones that allow me to give my creative input, but also provide me with new skills. My experience varies from drama features to reality competition, having worked both on and off-set. I enjoy designing graphics as well as getting my hands dirty with a painting job or aging and distressing. I'm more than keen to add to my experience and learn new things, and would be a great addition to any crew or workspace.

Skills

- Script breakdowns and conducting relevant research
- Set dressing fabrication for period films
- Constructing props and centrepieces for reality television
- Maintaining sets and props during filming
- Set construction, including working with power tools and a strong understanding of workshop health & safety
- Aging and altering of both props and costume
- Moulding and sculpting with oil-based and water-based clay, as well as plaster and silicone
- Leatherwork, including stitching, dyeing, stamping and embossing
- Creating conceptual packs for productions and budgeting for set design
- Skilled in Adobe Suite (Photoshop, Illustrator, Premiere Pro and Acrobat)
- Creating digital graphics, labels and posters
